WINTER-BLOOMING SPENCER SWEET PEAS

Beautiful large wavy-edged flowers, three and four on a stem. The finest Sweet Peas ever grown, and particularly suited to this climate. Planted in September they bloom from Christmas until June.

Separate Colors, Light Pink, Clear Pink, Rose Pink, Bi-color, Orange Scarlet, Red and White.

Price, per ounce \$1.00, Packet 25c
Fine Mixture, per ounce 75c, Packet 25c

CULTURAL DIRECTIONS

Select an open, sunny, warm position; make a furrow where the row is to be and let water run there until the soil is DEEPLY soaked.

Let it lie for a day or two until the soil is in proper working condition, without being too wet.

Spade the soil very deeply, pulverize it and rake it level. Sow the seed two inches apart and only two inches deep. All you have to do later is to keep the soil loose, and when really dry down below 3 inches, give a thorough watering by furrow a few inches from the plants. The first flowers are always small and must be picked off. In a short time the flowers will become larger and with longer stems.

When the plants are up, if the soil is light it can be enriched with commercial fertilizer or pulverized manure. Use about 20 pounds for each 100 feet of row. After the plants have been for some time in full bloom, if necessary some manure liquid once a week can be applied.

If you keep the flowers picked closely, the vines will continue to bloom till summer.
